

Method 1: Save Any Photo Document as a PDF Using Print

This method works with most apps, including Photos, Safari, Files, Notes, Mail, and many third-party apps.

Steps

1. Open the file/photo you want to convert.
2. Tap the **Share** button (the square with an upward arrow typically located in the bottom left).
3. Scroll down and tap **Print**.
4. A print preview appears.
5. Instead of printing:
 - Place two fingers on the preview and **pinch outward (zoom in)** on the preview.
 - Or press and hold the preview (depending on your iOS version).
6. The preview opens as a PDF.
7. Tap the **Share** button again.
8. Choose:
 - **Save to Files** to save the PDF
 - **Mail** to email it
 - **Messages** to send it
 - Any compatible app

Your document is now a PDF.

Method 2: Save from Files App

If your document is already in the Files app:

1. Open **Files**.
2. Locate the document.
3. Open it.
4. Tap **Share**.
5. Tap **Print**.
6. Zoom into the preview.
7. Tap **Share** again.
8. Save the PDF.
