Re: **Updated U9-U15 Pathways Recreation/Competitive**

The HEO Board of Directors have approved an updated Player Development Pathways Framework from U9 to U15 (attached document).

This one-page document helps streamline the seasonal pathways framework after tryouts/sort outs for both recreational and competitive emphasizing the allotment of games while sharing the importance of practices for each division.

HEO policies will be reviewed and updated on HEO's website in the near future.

Hockey Eastern Ontario Player Development Pathways Framework (U9-U15)

The Player Pathway is supported by the Hockey Canada Long-Term Player Development Model (LTPD). This framework provides the guiding principles for age appropriate and skill specific programming for all players in Hockey Canada's youth hockey system. By utilizing LTPD principles, Hockey Canada membership offers systems and structures that are more consistent and ensuring continuity as players move through the system from one age level to the next.

Player development is at the core of player pathways, with a focus on skill development so that each player will experience success in both practice and game settings. When viewed from the perspective of how kids learn, the number of repetitions of specific skills and situations that occur in practice versus a game, we quickly learned where players have a chance to develop the most: practice. Note that information below does not include mandatory pre-tryout/sort out skills sessions and tryout/sort outs sessions.

Seasonal Structure once teams rosters are tryouts/sort outs are completed.
